**NORTHERN MINING HIGHLIGHTS**

**NOUVELLES SUR LES MINES  
DU NORD**

Northwest Territories

Production was obtained from two open-pit and four underground mines which together produced lead, zinc, copper, gold, silver and tungsten. Lead-zinc accounted for 78 per cent of the total value of production. The Northwest Territories was the second largest lead producer in Canada. Total value of all production was \$223,047,000, up 40 per cent from 1973.

Mining Exploration

Mineral exploration expenditures in the Northwest Territories in 1974 amounted to approximately \$18 million, up approximately 80 per cent from the previous year due to renewed exploration.

There were 12,180 mineral claims recorded in the Northwest Territories in 1974, a decrease of 20 per cent from 1973. In addition, 39 prospecting permits covering approximately 7,000,000 acres of mining land, were granted. This was a 105 per cent increase over 1973.

Comparison of Mineral Production 1973-1974

<u>Northwest Territories</u>		<u>1973</u>	<u>1974 (000*)</u>

	Pounds	16,800	40
TOTAL		\$158,925,167	\$223,047

NOTE: All figures are on a calendar-year basis and provided by Statistics Canada and mining companies.

\* As figures for 1974 are preliminary estimates, they are expressed in units of one thousand. Figures for 1973 are final.

JANUARY HIGHLIGHTSYukon

The value of mining production in the Yukon increased from \$150,667,311 in 1973 to \$185,041,000 in 1974, an increase of \$34,373,689 or 23.3 per cent. Production came from three underground and two open-pit mines which together produced lead, zinc, copper, silver, asbestos and coal. The Yukon was the leading lead producer in Canada for the third consecutive year.

Mining Exploration

Due to new base metal discoveries near Faro and Goz Creek, exploration expenditures in the Yukon Territory amounted to approximately \$12 million in 1974, an increase of \$2.7 million from the previous year.

Claims recorded in the Yukon numbered 13,696, an increase of 4,313 from last year.

Comparison of Mineral Production 1973-1974

OPEN FILE RELEASE

FOR FEBRUARY, 1975

Index Lake, Northwest Territories  
Agricola Lake, Northwest Territories  
Hackett River, Northwest Territories

Geological maps of Index Lake 76 G/13, Agricola Lake 76 G/12, and Hackett River 76 F/16 at a scale of 1: 31,680 have been prepared by W.A. Padgham, C.W. Jefferson, E.A. Ronayne, V.Z. Sterenberg and D. Bryan, of the Department of Indian and Northern Affairs. Interim maps showing partly mapped portions of the volcanic belt in 76 F/9 and 76 G/5 are also available. The maps show the outcrop pattern and the mineral occurrences of the district as well as the geology. Descriptive notes are provided in the margins for 76 G/12 and 76 G/13. This file may be viewed in the offices of the Resident Geologists:

(1) Department of Indian and Northern Affairs, Box 1500, Yellowknife, N.W.T., XOE 1H0; (2) Department of Indian and Northern Affairs, Building 200, Takhini, Whitenorse, Yukon Territory, Y1A 3V1; and (3) Department of Indian and Northern Affairs, Room 554, 400 Laurier Ave. W., Ottawa, Ontario, K1A 0H4.

Copies may be obtained by application to the Resident Geologist, Box 1500, Yellowknife, Northwest Territories, XOE 1H0.  
Price: \$1.00 per map.

Territoires du Nord-Ouest

Quatre mines souterraines et deux à ciel ouvert ont globalement produit du plomb, du zinc, du cuivre, de l'or, de l'argent et du tungstène. L'exploitation du plomb et du zinc a représenté 78 pour cent de la valeur totale de la production. Les Territoires du Nord-Ouest se classent au deuxième rang des grands producteurs de plomb du Canada. La valeur totale de toute la production a été de \$223,047,000, soit 40 pour cent de plus qu'en 1973.

Exploration minière

En 1974, les dépenses d'exploration minière dans les Territoires du Nord-Ouest ont atteint environ 18 millions de dollars, soit approximativement 80 pour cent de plus que l'année précédente en raison de la reprise de la prospection.

Les concessions minières enregistrées dans les Territoires du Nord-Ouest se sont chiffrées à 12,180 en 1974, soit 20 pour cent de moins qu'en 1973. En outre, on a délivré 39 permis de prospection de terrains miniers visant quelque 7 millions d'acres, soit donc 105 pour cent de plus qu'en 1973.

État comparatif de la production minière pour 1973 et 1974

\* Les chiffres de 1974 étant provisoires, ils sont exprimés en milliers de dollars. Les chiffres de 1973 sont définitifs.

FAITS SAILLANTS DE JANVIERYukon

La valeur de la production minière du Yukon est passée de \$150,667,311 en 1973 à \$185,041,000 en 1974, soit un accroissement de \$34,828,211 ou de 23.3 pour cent. La production de plomb, de zinc, de cuivre, d'argent, d'amiante et de charbon provenait de trois mines souterraines et de deux à ciel ouvert. Le Yukon est depuis trois ans le principal producteur de plomb du Canada.

Exploration minière

Grâce aux nouveaux gisements de métal commun découverts près de Faro et de la crique Goz, les dépenses d'exploration au Yukon se sont élevées à environ 12 millions de dollars en 1974, soit une augmentation de 2.7 millions en regard de l'année précédente.

Les concessions minières enregistrées au Yukon se chiffraient à 13,696, soit 4,313 de plus que l'an dernier.

## Publication de dossiers

pour février 1975

Index Lake, Territoires du Nord-Ouest  
Agricola Lake, Territoires du Nord-Ouest  
Hackett River, Territoires du Nord-Ouest

Ces cartes géologiques d'Index Lake 76 G/13, d'Agricola Lake 76 G/12 et d'Hackett River 76 F/16 ont été dressées à l'échelle de 1:31, 680 par W.A. Padgham, C.W. Jefferson, E.A. Ronayne, V.Z. Sterenberg et D. Bryan, du ministère des Affaires indiennes et du Nord. Des cartes provisoires représentant certaines régions, en partie tracées, de la ceinture volcanique 76 F/9 et 76 G/5 sont aussi disponibles. Les cartes reproduisent le genre d'affleurement et les formations minéralogiques du district de même que la géologie. Des notes descriptives concernant 76 G/12 et 76 G/13 sont fournies dans les marges. On peut examiner ce dossier dans les bureaux des géologues résidants:

(1) Ministère des Affaires indiennes et du Nord, boîte postale 1500, Yellowknife, T.N.-O., XOE 1H0; (2) Ministère des Affaires indiennes et du Nord, Edifice 200, Takkini, Whitehorse, Territoire du Yukon, Y1A 3V1; et (3) Ministère des Affaires indiennes et du Nord, Pièce 554, 400 avenue Laurier Ouest, Ottawa, Ontario K1A 0H4.

Des exemplaires peuvent être obtenus en s'adressant au géologue résidant, boîte postale 1500, Yellowknife, Territoires du Nord-Ouest, XOE 1H0.

Prix: \$1.00 la carte.

**NORTHERN MINING HIGHLIGHTS**

**NOUVELLES SUR LES MINES  
DU NORD**

TRANSFER OF ARCTIC AND HUDSON BAY MINING  
RECORDING OFFICE FROM OTTAWA TO YELLOWKNIFE, N.W.T.

OTTAWA (March 7, 1975) -- Indian and Northern Affairs Minister Judd Buchanan today announced that the Mining Recording Office for the Arctic and Hudson Bay Mining District will be moved from Ottawa to Yellowknife, Northwest Territories, on April 1. From that date, all documents being submitted to the Mining Recorder under the Canada Mining Regulations, the Territorial Coal Regulations and the Territorial Dredging Regulations, as well as requests for claim maps, should be sent to P.O. Box 1500, Yellowknife.

As a convenience to the mining industry, there will be a transitional period until May 30. During this period, various application forms required under mining legislation will be accepted by the Ottawa office and reviewed before being sent to Yellowknife. The Ottawa office also will continue to issue prospectors' licences and claim tags, and supply standard forms.

Mining Recorders' Offices in the Yukon and Northwest Territories are responsible for the disposition of the mineral rights within their respective districts, and last year recorded a total of 24,686 claims.

With the transfer from Ottawa, all three Northwest Territories Mining Recorders' Officer - Arctic and Hudson Bay District, Nahanni District and the Mackenzie District - will be in Yellowknife.

TRANSFERT DES DOSSIERS MINIERS DE L'ARCTIQUE ET DE LA BAIE  
D'HUDSON, D'OTTAWA À YELLOWKNIFE (T.N.-O.).

OTTAWA (le 7 mars 1975) -- Le ministère des Affaires indiennes et du Nord, M. Judd Buchanan, a annoncé aujourd'hui que le bureau des registres miniers du district de l'Arctique et de la baie d'Hudson déménagera d'Ottawa à Yellowknife (T.N.-O.), le 1<sup>er</sup> avril prochain. À compter de cette date, tous les documents qui doivent être transmis au conservateur des registres miniers en vertu des règlements concernant les mines du Canada, des règlements concernant le charbon territorial et des règlements concernant le dragage territorial, ainsi que les demandes de cartes de concessions minières, devront être envoyés à la case postale 1500, Yellowknife.

Pour des fins utiles à l'industrie minière, il y aura cependant une période de transition qui s'étendra jusqu'au 30 mai. Au cours de cette période les diverses formules de demandes requises en vertu des règlements miniers du Canada seront reçues et étudiées par le bureau d'Ottawa avant d'être acheminées vers Yellowknife. Le bureau d'Ottawa continuera également d'émettre des permis de prospection et de fournir des étiquettes de concessions minières ainsi que les formules de demandes réglementaires.

Les bureaux des registraires miniers au Yukon et dans les Territoires du Nord-Ouest s'occupent de la disposition des droits miniers dans leurs districts respectifs. L'an dernier, ils ont enregistré un total de 24,686 concessions.

Par suite du transfert d'Ottawa, les trois bureaux des registraires miniers des Territoires du Nord-Ouest, soit le district de l'Arctique et de la baie d'Hudson, le district de Nahanni et le district du Mackenzie, se trouveront à Yellowknife.

RESULTS OF AIRBORNE ASBESTOS CONCENTRATIONS  
SURVEY AT CLINTON CREEK, YUKON MADE PUBLIC

OTTAWA (March 14, 1975) -- Northern Affairs  
Minister Judd Buchanan today made public a Department  
of National Health and Welfare report on airborne  
concentrations of asbestos fibres in the mine, mill  
and townsite of Cassiar Asbestos Corporation Limited  
at Clinton Creek, Yukon Territory.

Samples taken in the mill showed that 12 of 16 occupations studied fell between the British standard of two fibres per milliliter and the U.S. standard of five fibres per milliliter, while two samples had exposures above the U.S. standard and two samples had exposures below the British standard.

Four of eight in-mine samples had exposures below the two fibres per milliliter level and the remaining four fell between two and four fibres per milliliter levels.

Although there is no generally accepted standard for non-occupational exposure to asbestos fibres, in cases of other substances where standards have been established, the levels usually have been set at about one-fiftieth to one-hundredth of the occupational level.

At the Clinton Creek townsite, the highest concentration measured was 0.04 fibres per milliliter, which is one-fiftieth of the occupational standard of two fibres per milliliter recommended by the Department of National Health and Welfare.

In its report, the Department of National Health and Welfare survey team recommended that the average concentration of asbestos fibres to which a worker is exposed during a seven or eight-hour workday and a 40-hour workweek should not exceed two fibres per milliliter, that the company should have better

maintenance of certain equipment and machinery to prevent leakage of fibres, that vacuum cleaners should be used instead of shovels and brooms to clean up spillages, and that hoods and covers be installed at certain operations to prevent escape of fibres to the atmosphere.

Based on the report's recommendations, the Department of Indian and Northern Affairs will immediately issue instructions to the company to improve house-keeping methods to ensure that there is no build-up of fibres in the mill, to better maintain equipment and construct hoods and covers where necessary to prevent escape of fibres to the mill atmosphere, and to enforce the use of masks by employees in emergencies where concentrations are above the accepted level.

In addition, a D.I.N.A. environmental mining inspector will monitor asbestos levels by taking periodic readings of concentrations of airborne asbestos in the mine and mill.

"I, on the advice of my colleague, the Minister of National Health and Welfare, will be asking Commissioner Smith to consider the adoption of the two fibres per milliliter standard for the Yukon," Mr. Buchanan said.

The study to measure airborne asbestos at Clinton Creek was started last June following a request by the company union to the Department of Indian and Northern Affairs. The report was received by the Department on March 7, 1975.

Cassiar Asbestos Corporation Limited has been conducting in-plant surveys of levels of airborne asbestos in the mill almost from the start of operations at Clinton Creek. The company has adopted the U.S. standard of five fibres per milliliter, which is used in British Columbia, rather than the British standard of two fibres per milliliter, which is the standard of the International Labour Organization. It has just been adopted by Ontario.

The Department of National Health and Welfare survey team consisted of four Department scientists and the Department of Indian and Northern Affairs mines environmental engineer.

Both personal samples, obtained by fastening a monitor to the front of a worker's shirt collar and clipping a pump to his belt, and stationary samples, obtained by fastening a sampling unit to a post or other fixed object in a particular area, were collected. Air was drawn through filters, at a known rate for a measured period of time, by means of a small battery-operated pump connected to a monitor by rubber tubing.

Copies of the report are available from the  
Commissioner of the Yukon Territory at Whitehorse and  
the Department of Indian and Northern Affairs, northern  
natural resources and environment branch, at Ottawa.

RÉSULTATS DE L'ÉTUDE SUR LES CONCENTRATIONS D'AMIANTE  
DANS L'AIR, À CLINTON CREEK, AU YUKON

---

OTTAWA (le 14 mars 1975) -- Le ministre du Nord canadien, M. Judd Buchanan, a rendu public aujourd'hui un rapport du ministère de la Santé nationale et du Bien-être portant sur les concentrations de fibres d'amiante dans l'air, à l'emplacement de la mine, de l'usine et de l'agglomération de la Cassiar Asbestos Corporation situé à Clinton Creek, au Yukon.

•

Les échantillons prélevés dans l'usine ont démontré que, pour 12 des 16 professions étudiées, les concentrations se situaient entre les deux fibres par millilitre de la norme britannique et les cinq fibres par millilitre de la norme américaine, alors que deux autres échantillons dépassaient la norme américaine et que les deux derniers étaient inférieurs à la norme britannique.

Pour quatre des huit échantillons pris dans la mine, les concentrations étaient inférieures à deux fibres par millilitre et pour les quatre autres, elles se situaient entre deux et quatre fibres.

Il n'y aucune norme reconnue pour l'exposition non professionnelle aux fibres d'amiante, mais, pour d'autres substances, les normes se situent ordinairement entre 1/50 et 1/100 de la norme pour l'exposition professionnelle.

Dans l'agglomération de Clinton Creek, la plus forte concentration relevée a été de .04 fibre par millilitre, ce qui correspond à 1/50 de la norme de deux fibres par millilitre dont le ministère de la Santé nationale et du Bien-être recommande l'application pour l'exposition professionnelle.

Dans son rapport, le groupe du ministère de la Santé nationale et du Bien-être propose qu'un ouvrier qui travaille de sept à huit heures par jour et 40 heures par semaine ne soit pas exposé à une concentration de plus de deux fibres d'amiante par millilitre d'air, que la société concernée fasse un meilleur entretien de certains appareils et de certaines machines afin d'empêcher l'échappement de fibres, que l'on utilise des aspirateurs au lieu de pelles et balais pour remédier aux déversements accidentels et que des dispositifs de recouvrement et des bâches soient installés sur certains appareils afin d'empêcher la sortie de fibres par le système d'échappement.

En se fondant sur les recommandations contenues dans le rapport en question, le ministère des Affaires indiennes et du Nord donnera immédiatement des instructions à la société concernée afin que celle-ci perfectionne ses méthodes, de manière qu'il ne s'accumule pas de fibres dans l'usine, pour qu'elle fasse un meilleur entretien de ses appareils et, au besoin, pour qu'elle mette en place des dispositifs de recouvrement et des bâches afin d'empêcher l'échappement de fibres dans l'usine,

et pour qu'elle oblige son personnel à porter des masques dans des circonstances exceptionnelles, lorsque les concentrations sont trop élevées.

De plus, un inspecteur de l'environnement minier rattaché au Ministère des Affaires indiennes et du Nord fera des relevés périodiques des concentrations d'amiante dans l'air de la mine et de l'usine.

M. Buchanan a déclaré à ce sujet: "Après avoir consulté mon collègue, le ministre de la Santé nationale et du Bien-être, je demanderai au Commissaire Smith de songer à l'adoption pour le Yukon de la norme de deux fibres par millilitre."

L'étude en question a été menée en juin dernier à la suite d'une demande que le syndicat des salariés de la société a présentée au ministère des Affaires indiennes et du Nord. Le Ministère a reçu le rapport le 7 mars 1975.

La Cassiar Asbestos Corporation Limited a entrepris de mesurer la quantité d'amiante présente dans l'air de ses installations, et ce presque aussitôt qu'elle s'est installée à Clinton Creek. La société a adopté la norme américaine de cinq fibres par millilitre,

qui est appliquée par la Colombie-Britannique, au lieu de la norme britannique de deux fibres par millilitre, qui est la norme de l'Organisation internationale du Travail et que l'Ontario a récemment adoptée.

Le groupe qui a mené l'étude se composait de quatre scientifiques du ministère de la Santé nationale et du Bien-être et de l'ingénieur de l'environnement minier du ministère des Affaires indiennes et du Nord canadien.

On a prélevé deux sortes d'échantillons: des échantillons obtenus en fixant un appareil de contrôle à l'avant du col de la chemise des ouvriers et en fixant aussi une pompe à leur ceinture, et des échantillons obtenus en fixant un appareil de prélèvement à un poteau ou autre objet fixe situé en un lieu déterminé. L'air a été dirigé à travers des filtres à un débit et pendant une période de temps déterminée, au moyen d'une petite pompe fonctionnant à piles et raccordée à l'appareil de contrôle par des tubes de caoutchouc.

On peut se procurer des exemplaires du rapport en s'adressant au Commissaire du Yukon, à Whitehorse, ou

à la Direction des ressources naturelles et de  
l'environnement du Nord, ministère des Affaires  
indiennes et du Nord canadien, Ottawa.

**NORTHERN MINING HIGHLIGHTS**

**NOUVELLES SUR LES MINES  
DU NORD**

### Released Permit Reports

An index of technical reports submitted as evidence of exploration in prospecting permits to be released on April 1, 1975. The index, in National Topographic System order, was prepared through the facilities of the Canadian Index to Geoscience Data.

### Rapports publiés sur les permis

Un index des rapports techniques présentés comme preuve de travaux de prospection dans le cadre de permis délivrés à cette fin sera publié le 1<sup>er</sup> avril 1975. L'index, conçu d'après le système national de référence cartographique, a été élaboré grâce aux installations de l'index canadien des données des sciences de la terre.

AVIS

NOUS VOUS AVISONS QUE, conformément aux articles 26 et 28  
(1) du Règlement régissant l'exploitation minière au Canada:

- 1) Des permis de prospection ont été délivrés à l'égard des  
régions cartographiques indiquées ci-après selon le  
Système national de référence topographique:

<u>Numéro</u>	<u>Région carto- graphique</u>	<u>Titulaire de permis</u>
347	55M-12	Pan Ocean Oil Ltd.
348	56D-1	"
349	56J-13	Cominco Ltd.
350	95L-1	"
351	95L-8	"
352	66A-7	Urangesellschaft Canada Ltd.
353	66A-10	"
354	66B-6	"
355	66B-7	"
356	66G-2	"
357	66G-7	"
358	76N-6	Uranerz Exploration and Mining Ltd.
359	65H-9	Hudson Bay Exploration and Development Co. Ltd.
360	65H-10	"
361	95M-13	Shell Canada Ltd.
362	65P-14	Rio Alto Exploration Ltd.
363	97D-4	Fidelity Developments Inc.
364	97D-5	"

Nul autre que le titulaire d'un permis n'est autorisé à  
prospector, à jalonner ou faire inscrire des claims miniers  
situés dans la région pour laquelle le permis a été délivré.

...2

2) Les titulaires des permis de prospection indiqués ci-après ont libéré certaines étendues:

CLAIM STAKING RESTRICTIONS IN  
NORTHWEST TERRITORIES REMOVED

OTTAWA (April 18, 1975) -- Claim staking restrictions in the Northwest Territories imposed by Section 12 of the Canada Mining Regulations have been eliminated as of January 16, 1975.

Under Order-in-Council P.C. 1975-73, any licensee may now stake an unlimited number of claims in any area defined by a mineral claim staking sheet. Before January 16, a licensee could not stake more than 36 claims within each mineral claim staking sheet in any given year.

Before the staking restrictions were removed, there were differing interpretations of Section 12. It was common practice for a licensee to hire stakers to locate claims in excess of the 36 authorized by Section 12 and then have them transferred to him.

Because of this differing interpretation in the past, parliament, by Statute, has validated all recorded mineral claims and leases in excess of 36 claims acquired before January 16 by a licensee.

Further information concerning these new regulatory provisions may be obtained from the mining recorders for the Northwest Territories or the head of the Mining Lands Unit at Ottawa.

SUPPRESSION DES RESTRICTIONS VISANT LE JALONNEMENT DES  
CONCESSIONS MINIÈRES

OTTAWA (le 18 avril 1975) -- Les restrictions visant le jalonnement des concessions minières dans les Territoires du Nord-Ouest, imposées par l'article 12 du Règlement régissant l'exploitation minière au Canada, ont été supprimées le 16 janvier 1975.

En vertu de l'arrêté en conseil C.P. 1975-73, tout détenteur de permis peut maintenant jalonner un nombre illimité de concessions dans n'importe quelle région déterminée sur une feuille de jalonnement de concession minière. Avant le 16 janvier, un détenteur ne pouvait, pendant une année donnée, jalonner plus de 36 concessions, pour chaque feuille de jalonnement de concession minière.

Avant la suppression des restrictions de jalonnement, diverses interprétations étaient données à l'article 12 du Règlement. Il était d'usage courant pour un détenteur d'engager des jalonneurs pour localiser des concessions dont le nombre dépassait les 36 permises par l'article 12, et ensuite, de se les faire transférer.

À cause de ces différentes interprétations connues dans le passé, le Parlement, en vertu d'un décret, a validé toutes les concessions minières enregistrées, dont le nombre dépassait 36, et qui ont été acquises avant le 16 janvier par un détenteur de permis.

On peut obtenir de plus amples informations au sujet des nouvelles dispositions réglementaires en s'adressant aux conservateurs des registres miniers pour les Territoires du Nord-Ouest ou au chef du Service des terres minières à Ottawa.

1974 Yukon Mineral Industry Report  
Placed on Open File

OTTAWA, May 28, 1975 -- Manuscript copies of the Mineral Industry Report 1974, Yukon Territory, E G S 1975-9 will be available to the public for examination at Ottawa, Whitehorse and Yellowknife as of June 3, reports the exploration and geological services unit of the Department of Indian and Northern Affairs.

Prepared by D.I.N.A. regional geologist Dr. D.B. Craig, D.I.A.N.D. project geologist Dr. W.D. Sinclair and D.I.N.A. staff geologist J.M. Maloney, the report describes mining activity in 1974 on all properties in the Yukon.

Anyone interested in examining the report should contact D.B. Craig, 200 Takhini Building, Whitehorse (tel: 668-5151), R. Hornal, Yellowknife, (tel: 873-4421) or the exploration and geological unit, Department of Indian and Northern Affairs, Room 554, 400 Laurier Avenue West, Ottawa, K1A 0H4 (tel: 992-4991).

For further information please contact A.D. Oliver at 992-4991.

AVIS

Rapport sur l'industrie minière au Yukon pour 1974  
Placé dans un dossier non scellé

OTTAWA, le        mai 1975 -- La Sous-section des services d'exploration et de géologie du ministère des Affaires indiennes et du Nord signale que des exemplaires manuscrits du rapport sur l'industrie minière au Yukon pour 1974, services d'exploration et de géologie 1975-9, seront à la disposition du public à Ottawa, Whitehorse et Yellowknife à compter du 3 juin.

Rédigé par le géologue régional du Ministère, M. D.B. Craig, le géologue des travaux, M. W.D. Sinclair et le géologue en titre, M. J.M. Maloney, le rapport décrit l'activité minière de 1974 dans toutes les propriétés au Yukon.

Toute personne intéressée à consulter le rapport devra communiquer, à Whitehorse, avec M. D.B. Craig, 200, édifice Takhini (Tél.: 668-5151), à Yellowknife, avec M. R. Hornal (Tél.: 873-4421) ou avec le Service d'exploration et de géologie du ministère des Affaires indiennes et du Nord, pièce 554, 400 ouest, avenue Laurier, Ottawa, K1A 0H4 (Tél.: 992-4991).

Pour de plus amples informations, veuillez communiquer avec M. A.D. Oliver au numéro 992-4991.

Canadian Mine Rescue Competition

Rescue teams from several Yukon and Northwest Territories mines will compete at Yellowknife and Whitehorse on June 21 to determine which team will represent its respective territory at the Ninth Canadian Mine Rescue Championship.

The Championship will be held at Calgary on July 5 and will include mine rescue teams from all parts of Canada.

Teams participating at the Whitehorse regional competition include one from Whitehorse Copper and one from United Keno Hill. Vying to represent the Northwest Territories at the Yellowknife competition will be two teams from Pine Point, and a team each from Cantung, Giant and Con.

Championnat canadien de sauvetage dans les mines

Des équipes de sauvetage de plusieurs mines du Yukon et des Territoires du Nord-Ouest se disputeront le 21 juin, à Yellowknife et à Whitehorse, l'honneur de représenter leur territoire respectif au neuvième championnat canadien de sauvetage dans les mines.

Le championnat aura lieu le 5 juillet à Calgary. Des équipes venant de toutes les régions du Canada y participeront.

Parmi les équipes participant au championnat régional de Whitehorse se trouvent une de Whitehorse Copper et une de United Keno Hill. A Yellowknife, deux équipes de Pine Point et une chaque de Cantung, de Giant et de Con. concourront pour représenter les Territoires du Nord-Ouest.

NORTHERN SNOW AND ICE  
COVER REPORTS AVAILABLE

OTTAWA, (May 9, 1975) -- Four satellites circling the earth are keeping a close watch on snow and ice movements in Canada's northern territories for the Department of Indian and Northern Affairs.

Starting now, weekly reports giving 14-day forecasts of snow and ice conditions in the Yukon and Northwest Territories will be available without charge from the Department's resident geologists at Yellowknife and Whitehorse, or Gregory Geoscience Limited at Ottawa.

Prepared under contract by the Teledetection Services Division of Gregory Geoscience Limited, the weekly snow and ice cover watch reports will pinpoint the location of the receding snow line, indicate ice conditions on northern lakes and rivers, and forecast snow and ice cover. The reports will be published until freeze-up.

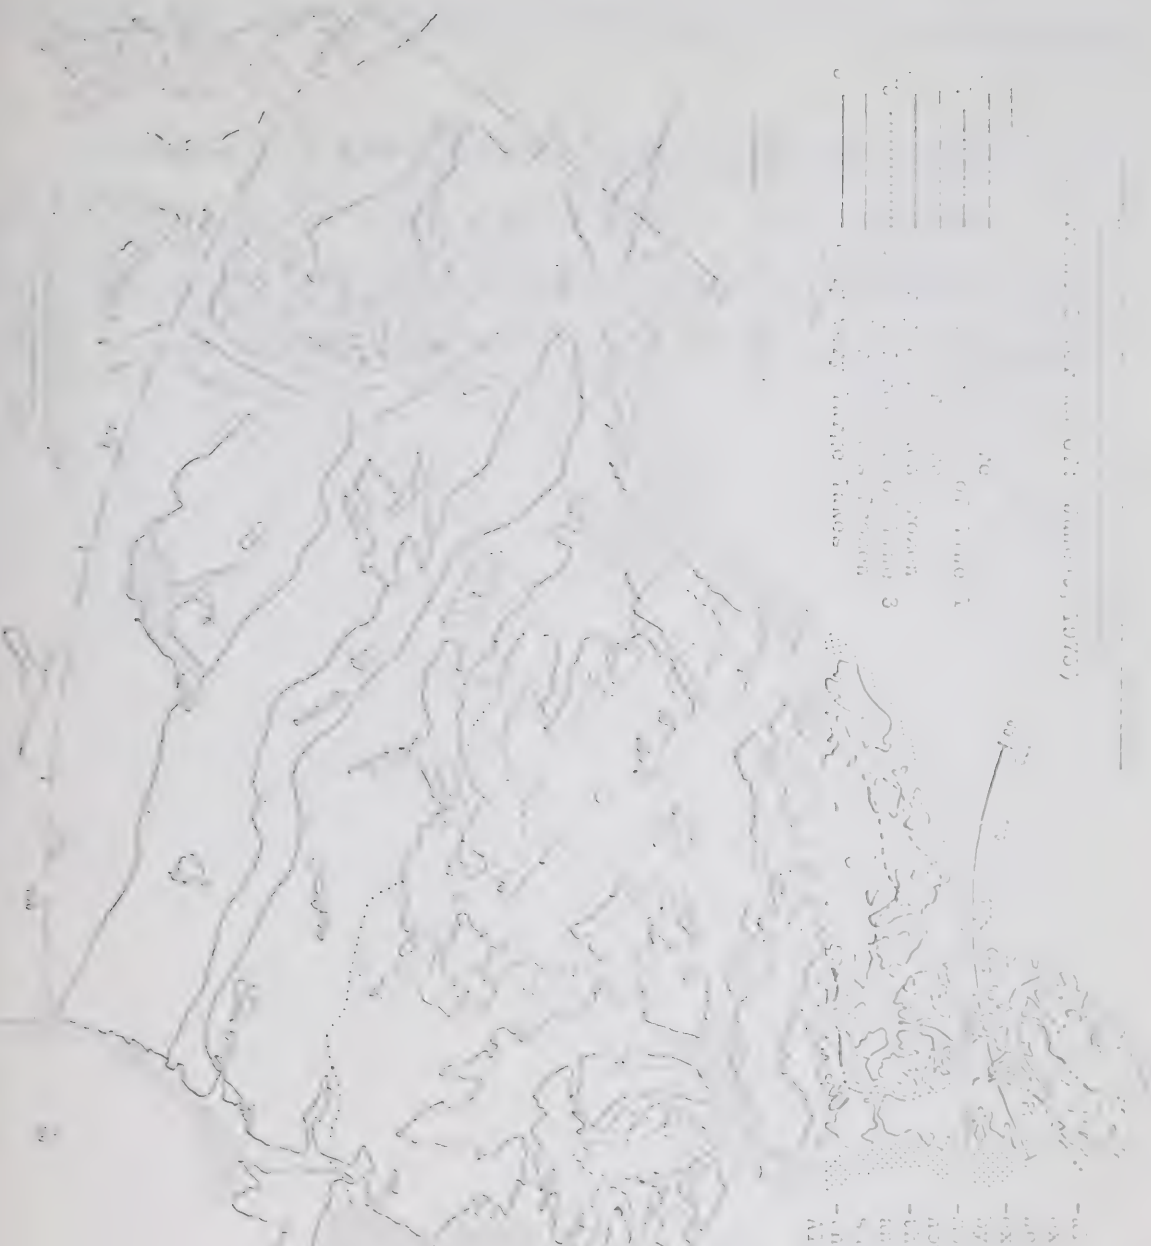

This is the first time that information on northern snow and ice conditions is being compiled and made available to the public. In the past, this service was used only by individual companies for information on specific locations.

To prepare the snow and ice cover maps, Gregory Geoscience Limited collates information provided by the two NASA LANDSAT remote sensing satellites which cover the North every nine days, daily information provided by two NOAA meteorological satellites, and daily weather reports from Arctic meteorological stations.

Northern residents who want snow and ice cover reports should contact R.W. Hornal, D.I.N.A regional geologist at Post Office Box 1500, Yellowknife or D.B. Craig, D.I.N.A. regional geologist, at 200 Takhini Building, Whitehorse.

the ice of the mountains are low snow-free except for the mountains and very local areas along the Arctic coast.

extensive snow-melt on Baffin Is. was produced by a week of continued warm weather.

the ice of the islands of the Western Arctic, including the sea ice in Coronation Gulf, Queen Maud Gulf and the Strait is melting as indicated by surface water.

the heavy pack ice along the north slope of Alaskan is showing signs of loosening up.

the ice of June most land areas will be snow-free except for local areas in the western islands and the major snow fields along eastern Ellesmere, Devon and Baffin islands.

Great Bear Lake will have open water within two weeks.

the gulfs and straits south of Victoria Is. will have some areas of open water within the next two weeks.

## BULLETINS SUR LA COUVERTURE DE NEIGE ET DE GLACE DANS LE NORD

OTTAWA (le 9 mai 1975) -- Grâce à quatre satellites en orbite autour de la terre, le ministère des Affaires indiennes et du Nord est tenu au courant du mouvement des neiges et des glaces dans les territoires septentrionaux.

À partir d'aujourd'hui, les géologues du Ministère en poste à Yellowknife et à Whitehorse, ainsi que la Gregory Geoscience Limited, à Ottawa, seront en mesure de fournir au public, sans aucuns frais, des bulletins hebdomadaires dans lesquels figureront des prévisions sur l'état de la couverture de neige et de glace au Yukon et dans les Territoires du Nord-Ouest, prévisions valables pour une période de 14 jours.

Rédigés à forfait par la Division des services de télédétection de la Gregory Geoscience Limited, ces bulletins hebdomadaires détermineront avec précision le recul de la limite climatique du manteau nival, ainsi que l'état de la glace sur les lacs et les rivières du Nord, et contiendront également des prévisions sur les mouvements de la couverture de neige et de glace. La publication de ces bulletins cessera au moment du gel.

C'est la première fois que des informations sur l'état de la neige et de la glace sont réunies et rendues accessibles au public. Par le passé, seules des compagnies privées utilisaient ce service pour obtenir des renseignements sur des emplacements bien particuliers.

Pour dresser les cartes de la couverture de neige et de glace, la Gregory Geoscience Limited rassemble les données fournies par les deux satellites de télédétection AMESAT de la NASA qui photographient le Nord tous les neuf jours, les données journalières produites par deux satellites météorologiques du NOAA, ainsi que les enseignements publiés dans les bulletins météorologiques quotidiens qui proviennent des stations de l'Arctique.

Les habitants du Nord désireux de se procurer ces bulletins sont priés de communiquer avec R.W. Hornal, géologue régional au MAIN, B.P. 1,500, Yellowknife, ou avec D.B. Craig, géologue régional au MAIN, au 200, Immeuble Lakshini, Whitehorse.

GEOLOGICAL PROJECTS

Now that the summer field season is here, Department of Indian and Northern Affairs geologists are undertaking several mapping and special studies assignments.

Geological compilation maps and field checks are being completed in National Topographical System area 115-I-11 in the Yukon Territory by Dr. W.D. Sinclair; in the Northwest Territories N.T.S. 85-J-9,10, 76-F-9,16 and 76-K-1,2 by Dr. W. Padgham, and in N.T.S. areas 65-H-9,16, 65-I-15 and 55-L-4 by P. Laporte.

Special studies being undertaken in Canada's northern territories include:

- a study of the geomorphology of the Klondike placer gold-fields in the Yukon Territory by Dr. J.A. Elson, department of geological sciences, McGill University. The study will determine the origin of the Klondike gold deposits by studying weathering, mass wasting, fluvial erosion and sedimentation, and involve the preparation of a map showing relevant geomorphic features, placer workings, lode gold occurrences and bedrock features related to surface deposits and geomorphology.
- a program of measuring stratigraphic sections in the Mackenzie Mountains, N.W.T. The study, which will cover the area between Palmer Lake and Bonnet Plume, is under the direction of Fred Krause, University of Calgary, and Department geologist Jim Murphy.

- a study of the fluid inclusion of zinc-lead deposits in the Yukon and adjacent N.W.T. areas by Dr. Colin Godwin, department of geological sciences, University of British Columbia.
- a study on the composition, variations, marginal features and mode of emplacement of the Clinton Creek Ultramafic Pluton. The study will be under the direction of Dr. A.J. Sinclair, department of geological sciences, University of British Columbia.
- a study on the magnetic and metamorphic history of the Athapuscow Aulacogen, N.W.T. under the direction of Roger D. Morton, department of geology, University of Alberta at Edmonton.
- a study involving the sampling and structural mapping of gold occurrences in the Yellowknife sediments. The study is under the direction of J. Seaton, department geologist.
- a study involving the location and mapping of soapstone occurrences on Southern Baffin Island. The study by Dr. D. Hogarth, University of Ottawa, is sponsored by the Government of the N.W.T. and the Department of Indian and Northern Affairs. Department geologist P. Laporte will be conducting a similar project in the northern district of Keewatin.
- a reconnaissance geochemical survey on Northern Victoria Island will be conducted by Dr. Gibbons, Department geologist, Arctic District. The study is being conducted with the co-operation with the Department of Energy, Mines and Resources' Polar Continental Shelf Project and Earth Physics Branch.

NOTES FROM THE RESIDENT GEOLOGIST N.W.T. FOR MAY

By the end of the month mineral exploration activities were widespread throughout the N.W.T.

Underground development work continued on gold prospects at Courageous Lake (Salmita option of Giant Yellowknife Mines Ltd.) and at Bullmoose Lake (TA option of Terra Mining and Exploration Ltd.). O'Brien Gold Mines Ltd. moved in mining supplies to their property on the Kognak River. Cadillac Explorations Ltd. began an extension to their lowest adit on their No. 3 zone in an attempt to increase ore reserves.

Diamond drilling programs were underway on several properties.

- a) Cominco Ltd. completed their program of drilling on the Perry River option. Three holes were drilled.
- b) Noranda Exploration Ltd. drilled one hole on the Point Lake copper-lead-zinc showing reported by Dr. Henderson of the Geological Survey of Canada in October, 1974.
- c) Cominco Ltd. commenced drilling on the Bathurst Norsemes property and on the RUN claims, 15 miles northwest of the High Lake deposit.
- d) Texasgulf Canada Ltd. had two drills in operation on their permit east of Takijug Lake.
- e) Cleaver Lake Mines Ltd. completed their first nine holes through a bornite and chalcocite deposit on the Sloan River. Their best reported intersection was 10 ft. grading 7.33% Cu and 0.20% Bi.
- f) Giant Yellowknife Mines Ltd. commenced further evaluation of the Arcadia gold prospect on the shore of Coronation Gulf.
- g) St. Joseph Exploration Ltd. commenced drilling the Gemex copper-zinc discovery at Heninga Lake.
- h) Phelps - Dodge Ltd. suspended a drill program at Rochon Lake in mid-month until after break up.
- i) Great Plains Development Co. of Canada Ltd. completed over 2000 ft. of drilling in seven holes on a copper prospect at Talthelei Narrows on Great Slave Lake.

Several companies completed aerial electromagnetic surveys in the High Lake, Hackett River, Takijug Lake, Quartzite Lake, and Ferguson River areas.

Uranium exploration commenced with Cominco beginning programs at Baker Lake (Pan Ocean option) and at St. Germaine Lake and several companies examining prospects in the Bear Province and in the Churchill Province south of Great Slave Lake.

Several ground parties were in the field by the end of the month doing geology and ground geophysics for Aquitaine in the Eskimo Point area; for U.S. Steel in the Ferguson River area; for Noranda in the Kaminak Lake area, in the Hackett River, in the High Lake area and in the Point Lake area; for Texasgulf in the Itchen Lake area; for Dupont in the Regan Lake area; and for Great Plains in the Muskox Lake area.

Activity in the Mackenzie Mountains was hampered by snow but some prospecting had started by the end of May.

Mr. Pierre Laporte rejoined the staff after two years at Brock University where he completed his masters thesis. Miss Crystal Ritchie joined the staff as a clerk-typist. A new Nahanni District Geologist, Mr. C. Lord, was hired and will report for duty in July.

## PROJECTS GEOLOGIQUE

Maintenant que la saison des travaux d'été sur le terrain est en cours, les géologues du ministère des Affaires indiennes et du Nord ont entrepris plusieurs études cartographiques et autres études spéciales.

La préparation de cartes géologiques et les vérifications sur le terrain seront terminées pour la région 115-I-11 du Yukon, selon le système national de référence cartographique, par M. W.D. Sinclair; dans les Territoires du Nord-Ouest, pour les régions N.T.S. 85-J-9, 10, 76-F-9, 16 et 76-K-1, 2, par M. Padgham, et pour les régions N.T.S. 65-H-9, 16, 65-I-15 et 55-L-4, par M. P. Laporte.

Les études spéciales entreprises dans les territoires septentrionaux du Canada comprennent:

- Une étude géomorphologique d'un gisement placer aurifère du Klondike, du Yukon, par M. J.A. Elson, du département de géologie de l'Université McGill. L'étude a pour but de déterminer l'origine des dépôts aurifères du Klondike par l'examen de l'altération des formations, des mouvements de masse et de l'érosion et de la sédimentation fluviales. L'étude comprendra la préparation d'une carte indiquant les caractéristiques géomorphologiques d'intérêt, les travaux entrepris sur les palcers, les filons d'or et les caractéristiques de la roche en place par rapport à la géomorphologie et aux dépôts superficiels.

- La mise sur pied d'un programme de mesure des couches stratigraphiques des monts Mackenzie (T.N.-O.). L'étude, qui s'effectuera dans le secteur compris entre le lac Palmer et la rivière Plume du Bonnet, sera sous la direction de M. Fred Krause, de l'Université de Calgary et du géologue du Ministère, M. Jim Murphy.
- Une étude de l'inclusion de liquides dans les dépôts de plomb-zinc du Yukon et des secteurs contigus des T.N.-O., qui sera menée par M. Colin Godwin, du département de géologie de l'Université de la Colombie-Britannique.
- Une étude de la composition, des variations, des caractéristiques de la région périphérique et de la mise en place de la roche plutonienne ultra-basique du ruisseau Clinton. L'étude sera dirigée par M. A.J. Sinclair, du département de géologie de l'Université de Colombie-Britannique.
- Une étude de l'évolution magnétique et métamorphique de l'"Athapuscow Aulacogen", (T.N.-O.), qui sera sous la conduite de M. Roger D. Morton, du département de géologie de l'Université de l'Alberta, à Edmonton.

- Une étude en vue de l'échantillonnage et de la préparation d'une carte structurelle des venues aurifères dans les sédiments de Yellowknife. L'étude est sous la responsabilité de J. Seaton, géologue du Ministère.
- Une étude de localisation des venues de stéatite dans le secteur sud de l'île Baffin. L'étude, qui sera menée par M. D. Hogarth, de l'Université d'Ottawa, est commanditée par l'Administration des T.N.-O. et le ministère des Affaires indiennes et du Nord. M. P. Laporte, géologue au service de ce Ministère, conduira une étude similaire dans la région septentrionale de Keewatin.
- Un inventaire géochimique du nord de l'île Victoria sera sous la direction de M. Gibbons, géologue du Ministère affecté au district de l'Arctique. L'étude sera menée conjointement avec la Direction de la physique du globe et les responsables de l'Etude du plateau continental polaire, du ministère de l'Énergie, des Mines et des Ressources.

NOTES POUR LE MOIS DE MAI FOURNIES PAR LE GEOLOGUE RESIDENT DES T.N.-O.

À la fin du mois, il y avait de la prospection minière dans tous les T.N.-O.

Les travaux de développement souterrain se sont poursuivis dans les zones aurifères d'intérêt du lac Courageous (option Salmita de la Giant Yellowknife Mines Ltd.) et au lac Bullmoose (option TA de Terra Mining and Exploration Ltd.). La O'Brien Gold Mines Ltd. a entrepris des travaux dans les réserves minières de sa propriété sur la rivière Kognak. La Cadillac Explorations Ltd. a entrepris l'extension de ses travaux jusqu'à la plus basse galerie dans sa zone no 3 en vue d'augmenter ses réserves de minerais.

Des programmes de forage au diamant ont été entrepris sur plusieurs propriétés.

- a) La Cominco Ltd. a terminé son programme de forage pour son option sur la rivière Perry. Trois forages ont eu lieu.
- b) La Noranda Exploration Ltd. a foré un trou sur la venue de cuivre-plomb-zinc du lac Point signalée en octobre 1974 par le docteur Henderson, de la Commission géologique du Canada.
- c) La Cominco Ltd. a entrepris des forages sur la propriété de la Bathurst Norsemynes et sur les claims RUN, à 15 milles au nord-ouest du dépôt de High Lake.

- d) La Texasgulf Canada Ltd. avait deux foreuses en fonctionnement dans la zone à l'est de Takijug Lake pour laquelle elle détient un permis.
- e) La Cleaver Lake Mines Ltd. a terminé le forage des neuf premiers trous dans un dépôt de bornite et de chalcosine de la rivière Sloan. Le meilleur recoupement déclaré par la Compagnie fut de 10 pieds et titra 7.33% en Cu et 0.20% en Bi.
- f) La Giant Yellowknife Mines Ltd. a commencé l'évaluation de la zone aurifère d'intérêt Arcadia, sur le littoral du golfe du Couronnement.
- g) La St. Joseph Exploration Ltd. a entrepris le forage de la découverte Gemex de cuivre-zinc, à Heninga Lake.
- h) La Phelps - Dodge Ltd. a interrompu vers le milieu du mois son programme de forage au lac Rochon, et ne le reprendra qu'après le dégel.
- i) La Great Plains Development Co. of Canada Ltd. a terminé le forage de sept trous, d'une profondeur totale de plus de 2000 pieds, dans une zone cuprifère d'intérêt, à Talthelei Narrows, sur le Grand lac des Esclaves.

Plusieurs compagnies ont terminé des levés électromagnétiques aériens dans les régions de High Lake, de Hackett River, de Takijug Lake, de Quartzite Lake et de Ferguson River.

La recherche d'uranium a été lancée par la Cominco, qui a entrepris la mise en oeuvre de programmes au lac Baker (l'option Pan Ocean) et au lac Ste-Germaine. Plusieurs sociétés examinent les zones d'intérêt dans les provinces de Bear et de Churchill, au sud du Grand lac des Esclaves.

Plusieurs groupes de prospection au sol ont entrepris des travaux à la fin du mois, en particulier des études géologiques et géophysiques pour l'Aquitaine, dans la région de Eskimo Point, pour la U.S. Steel, dans la région de la rivière Ferguson, pour la Noranda, dans les régions du lac Kaminak, de la rivière Hackett, de High Lake et de Point Lake, pour la Texasgulf, dans la région du lac Itchen, et pour la Dupont, dans la région du lac Regan, ainsi que pour la Great Plains, dans la région du lac Muskox.

Les activités dans le secteur des monts Mackenzie ont été ralenties par la neige, mais quelques travaux de prospection étaient quand même commencés à la fin de mai.

M. Pierre Laporte a rejoint l'équipe après avoir passé deux ans à l'Université Brock où il a terminé sa thèse de maîtrise. Mlle Crystal Ritchie fait maintenant partie de notre personnel à titre de commis-dactylo. Le district de Nahanni s'est assuré les services d'un nouveau géologue, M. C. Lord, qui est entré en fonctions en juillet.

DU NORD**

N O T I C E

THIRD ANNUAL GEOSCIENCE FORUMS

Two-day Geoscience Forums will be held at Whitehorse and Yellowknife in early December. This is the third year the forums have been held in the North.

Sponsored by the Department of Indian and Northern Affairs, the Department of Energy, Mines and Resources, the Yukon Chamber of Mines and the Northwest Territories Chamber of Mines, the meetings will be held at Whitehorse on December 2 and 3, and Yellowknife on December 4 and 5.

Further information on the Geoscience Forum program will be published in the Department of Indian and Northern Affairs Mining Section September Monthly Statistical Report and mining trade publications.

AVIS

TROISIÈMES COLLOQUES ANNUELS DE GÉOSCIENCE

Des colloques d'une durée de deux jours sur les géosciences auront lieu à Whitehorse et à Yellowknife au début du mois de décembre. Ce sera la troisième année que les colloques auront lieu dans le Nord.

Ces réunions, parrainées par le ministère des Affaires indiennes et du Nord canadien, par le ministère de l'Energie, des Mines et des Ressources et par les Chambres des Mines du Yukon et des Territoires du Nord-Ouest, se tiendront à Whitehorse les 2 et 3 décembre et à Yellowknife les 4 et 5 décembre.

De plus amples renseignements sur le programme de ces colloques seront publiés dans le rapport statistique mensuel de septembre de la Section de l'exploitation minière du ministère des Affaires indiennes et du Nord et dans diverses publications de l'industrie minière.

**NORTHERN MINING HIGHLIGHTS**

**NOUVELLES SUR LES MINES  
DU NORD**

Government/Industry Geoscience Forums  
to be held in Whitehorse and Yellowknife

Two government industry geoscience forums will be held again in December this year in Whitehorse, Yukon Territory and Yellowknife, Northwest Territories. They are organized under the joint sponsorship of the Geological Survey of Canada, Department of Energy, Mines and Resources, the Northern Natural Resources and Environmental Branch of the Department of Indian and Northern Affairs and the Yukon and Northwest Territories Chambers of Mines.

The attendance at and interest expressed in the previous Geoscience forums has indicated the value of repeating the program in this, the third year. The aim of the forums is to provide a platform where government geologists and industry representatives presently involved in northern exploration can develop and expand effective communications resulting in an exchange of ideas and objectives. The Whitehorse forum, chaired by R.R. McLeod, Assistant Regional Director of Non-Renewable Resources, D.I.N.A., will be held on December 2 and 3. The speakers will include: J.O. Wheeler, G.H. Eisbacher, K.M. Dawson, Geological Survey of Canada and M.J. Ruel, D.B. Craig, M. Milner, J. Morin, C. Lord and F. Krause from the Department of Indian and Northern Affairs. In addition, J. Crawford and P. Risby - Welcome North Mines Ltd., C. Ogilvy - Yukon Chamber of Mines, G. Smith - Cassiar Asbestos Corp. Ltd., S. Campbell and A.J. Sinclair from the University of British Columbia will present papers.

The forum in Whitehorse will be opened at 9:00 a.m. on December 2 and will finish at 12 noon on December 3. Those interested in attending should contact Cam Ogilvy, Manager of the Yukon Chamber of Mines, Whitehorse who is responsible for the administrative arrangements. Tel.: 403-667-2090.

On December 4 and the morning of December 5, a similar forum chaired by R. Hornal, Assistant Regional Director of Non-Renewable Resources, D.I.N.A., will be held in Yellowknife. Those interested in attending this forum are asked to contact Mrs. Ester Braden, Manager of the Northwest Territories Chamber of Mines, Yellowknife, Tel.: 403-873-5281, or Mrs. Mae Sigvaldason Tel.: 403-873-4421. Papers will be presented by J.E. Reesor, F.H.A. Campbell, M. Cecile, J.R. Henderson, G.D. Jackson, V. Rusicka of the Geological Survey of Canada and M.J. Ruel, W.A. Padgham, K. Barrett, W. Gibbons, C. Jefferson, F. Krause, P.J. Laporte, C. Lord, J. Morin and J.B. Seaton of the Department of Indian and Northern Affairs. From industry, speakers will include M. Casselman and P. Wilton - Cominco Ltd., M. McArthur - Welcome North Mines Ltd., D. Rotherham and J. Morgantie - Placer Development Ltd. and B. Watson from Giant Yellowknife Mines Ltd.

For the convenience of persons wishing to attend both forums, an aircraft will be available to fly from Edmonton to Whitehorse to Yellowknife and back to Edmonton providing that at least 30 people are interested in utilizing the service. The aircraft would leave Edmonton on December 1 and the cost of the round trip would be about \$300. The individual cost of any of the three flights will be provided by Mrs. Braden on request. Anyone wishing to travel on the flight should advise her when they send details concerning their proposed attendance at the Yellowknife Forum. Apart from the above possible over all arrangement persons attending either or both forums should make their own travel and accommodation arrangements.

Colloques des secteur public et privé  
sur les sciences de la terre à Whitehorse et à Yellowknife

C'est en décembre prochain que se tiendront à Yellowknife (T.N.-O) et Whitehorse (Yukon) deux colloques sur les sciences de la terre. Leur organisation relève de la Commission géologique du Canada, du ministère de l'Energie, des Mines et des Ressources, de la Direction des ressources naturelles et de l'environnement du Nord (ministère des Affaires indiennes et du Nord canadien) et des Chambres des mines du Yukon et des Territoires du Nord-Ouest.

La participation aux colloques sur les sciences de la terre tenus antérieurement et l'intérêt manifesté à leur égard ont incité les organisateurs à répéter l'expérience pour une troisième année consécutive. Ces colloques doivent permettre d'améliorer les contacts entre les géologues fédéraux et les représentants industriels et ainsi d'en arriver à un échange d'idées et d'objectifs. Le colloque de Whitehorse, présidé par M. R.R. McLeod, Directeur régional adjoint des ressources non renouvelables, M.A.I.N.C. se tiendra les 2 et 3 décembre. Parmi les orateurs figureront: MM. J.O. Wheeler, G.H. Eisbacher K.M. Dawson, de la Commission géologique du Canada, et M.J. Ruel, D.B. Craig, M. Milner, J. Morin, C. Lord et F. Krause, du ministère des Affaires indiennes et du Nord canadien. De plus, certains documents seront présentés par

MM. J. Crawford et P. Risby, de la Welcome North Mines Ltd., C. Ogilvy, de la Yukon Chamber of Mines, G. Smith, de la Cassiar Asbestos Corp. Ltd., S. Campbell et A.J. Sinclair de l'Université de Colombie-Britannique.

A Whitehorse, le colloque débutera le 2 décembre à 9h et se terminera le lendemain à midi. Les personnes intéressées à y assister doivent s'adresser auprès de M. Cam Ogilvy, directeur de la Yukon Chamber of Mines, à Whitehorse, qui s'occupe des préparatifs. Le numéro de téléphone à composer est: 403-667-2090.

Le 4 décembre et le matin du 5 décembre, un colloque du même genre, présidé par M.R. Hornal, Directeur régional adjoint des ressources non renouvelables, M.A.I.N.C., se tiendra à Yellowknife. Les personnes intéressées à y participer sont priées de communiquer avec M<sup>me</sup> Ester Braden, directrice de la Northwest Territories Chamber of Mines, à Yellowknife, au numéro de téléphone: 403-873-5281, ou avec M<sup>me</sup> Mae Sigvaldason, au numéro de téléphone: 403-873-4421. Des documents seront présentés par MM. J.E. Reesor, F.H.A. Campbell, M. Cecile, J.R. Henderson, G.D. Jackson, V. Rusicka, de la Commission géologique du Canada et MM. M.J. Ruel, W.A. Padgham, K. Barret, W. Gibbons, C. Jefferson, F. Krause, P.J. Laporte, C. Lord, J. Morin et H.B. Seaton, du ministère des Affaires indiennes et du Nord canadien. Parmi les orateurs du domaine de

l'industrie figureront MM. M. Casselman et P. Wilton, de la Cominco Ltd., M. McArthur, de la Welcome North Mines Ltd., D. Rotherham et J. Morgantie, de la Placer Development Ltd. et B. Watson de la Giant Yellowknife Mines Ltd.

Un avion spécial a été affrété à l'intention des personnes intéressées à assister à ces deux colloques. Pour effectuer le trajet Edmonton-Whitehorse-Yellowknife-Edmonton, l'avion devra compter au moins 30 passager. Ce dernier quittera Edmonton le 1<sup>er</sup> décembre; il en coûtera environ \$300 aller-retour. Au sujet du coût de chaque étape, on peut s'adresser à M<sup>me</sup> Braden.

Toute personne désireuse de bénéficier de ce service doit annexer à sa demand de participation au colloque de Yellowknife une note explicative en ce sens. Les personnes qui assisteront à un ou aux deux colloques devront veiller elles-mêmes à leur transport et à leur hébergement, si elles n'entendent pas profiter des arrangement susmentionnés.
